

NURSERY SLEEP POLICY

Children need sleep and rest periods to help with their development. This policy has therefore been developed to ensure all children are kept safe and their well-being is nurtured while they sleep in the Nursery.

All children develop at different rates. As a result, we need to adapt our practice and provision in order to meet these needs throughout the day. As children grow, they usually develop a routine in which they can reduce the length or frequency of daytime sleeps. Children at the Nursery will have the opportunity to rest or sleep if they need or want to. At these times, the staff will create an environment for the children to rest or sleep, i.e. a quiet area to cuddle up with a book or to access a sleep mat for older children. Babies and younger children will use the sleep area.

Whilst parental wishes will be taken into consideration when allowing a child to sleep, staff cannot force a child to sleep, to wake up or stay awake against his or her will, as this is an Ofsted regulation. During initial settling in visits, each child's individual day time sleeping routines will be discussed to consider the length of sleep, any comforters used to support, a child's sleeping position, as well as any key words or actions a child might display in order to indicate that they need to sleep.

The safety of babies' sleeping is paramount. Our policy follows the advice provided by The Cot Death Society and Lullaby Trust to minimise the risk of Sudden Infant Death. We make sure that:

- Babies are placed on their backs to sleep; however, once a baby can roll from back to front and back again, on their own, they can be left to find their own position
- Babies/toddlers are never put down to sleep with a bottle to self-feed
- Babies/toddlers are monitored visually when sleeping with a minimum of two staff members present at all times. Checks are recorded every 15 minutes and babies are never left in a separate sleep room without staff supervision at all times
- When monitoring, the staff member looks for the rise and fall of the chest and if the sleep position has changed
- As good practice, we monitor new baby/child sleeping during the first few weeks, every five minutes, until we are familiar with the child and their sleeping routines to offer reassurance to them and their families
- We provide a safe sleeping environment by:
 - Monitoring the room temperature
 - Using clean, light bedding/blankets and ensuring babies are appropriately dressed for sleep to avoid overheating
 - Only using safety-approved sleeping equipment (i.e. pods or mats) that are compliant with British Standard regulations, and ensuring mattress covers are used in conjunction with a clean fitted sheet
 - Only letting babies sleep in prams if they lie flat and we have parents' written permission
 - Keeping all spaces around beds clear from hanging objects i.e. hanging cords, blind cords, drawstring bags
 - Ensuring every baby/toddler is provided with clean bedding

- Transferring any baby who falls asleep while being nursed by a practitioner to a safe sleeping surface to complete their rest
- Having a no-smoking policy
- Blankets are not placed over prams, pods or a child's head or face to ensure that we can see the child at all times and to ensure the blanket cannot fall on the child
- If parents wish practitioners to reduce or stop their child's sleep, they must discuss this first with the Nursery Manager and their child's Key Person

Staff will discuss any changes in sleep routines at the end of the day and share observations and information about children's behaviour when they do not receive enough sleep.

Sleeping twins

We follow the advice from The Lullaby Trust regarding sleeping twins and will not put them together in the same cot to sleep.
